

Please join us for School Night at the Apple Store.

Come celebrate the creativity of Easton Area School District.

You, your family, and friends are invited to join Easton Area School District at the Apple Store, Lehigh Valley, to celebrate the creative work our students have produced using a Mac.

You'll see the amazing projects our students can create when they combine hands-on learning with the right technology.

We hope you are as excited as we are to share in their accomplishments. We look forward to seeing you.

Best regards,
Easton Area School District

About School Night at the Apple Store

School Night at the Apple Store is a worldwide program that gives teachers and students a community forum to showcase their projects created on a Mac. Family, friends, and other students can share in these achievements in a supportive environment that celebrates learning and creativity. Each student receives a School Night at the Apple Store T-shirt, and the School Champion receives a complimentary one year membership to One to One, personal training at the Apple Retail Store.

With Apple technology, the possibilities are endless. The iLife '08 applications allow students to create and present projects in new and exciting ways. iPhoto lets students create digital photo galleries, slideshows, photo albums, and calendars. With iMovie and iDVD they can produce video reports and movies that bring lessons to life. GarageBand allows students to perform, record, and create original music and podcasts. And with iWeb, students can post photos, movies, projects, podcasts, and journals to the web for the entire class to listen to, read, and enjoy.

The Apple Store

The Apple Retail Store is an ideal place for students, teachers, and parents to discover and learn more about digital media. In addition to free workshops, the Apple Store also hosts Apple Camp each summer and Youth workshops year-round to help kids get the most out of the Mac. Visit www.apple.com/retail for more details.
